

## Corrigendum 1 to Request for Proposal (RFP) for the Development of the OfficialGames Information Appand Virtual Torch App

Date: 17/11/2014

Ref: Tender No: 61/NGOC/2014-15

### 1. The modified Pre-qualification criteria are given below:

- a. *The bidder should have prior experience of at least 1.5 years in software development.*
- b. *The bidder must have at least one app on the Android App Store, which performs the following:*
  - (i) *Notify users with a notification when push messages are received*
  - (ii) *Periodically checks online for updates and downloads them automatically*

*(It is not necessary that a single app performs all the above tasks)*
- c. *The company must have at least one app available on the Android App Store with at least 10,000 downloads.*

### 2. Response to Queries

The following clarifications are issued in response to queries from potential bidders:

SI No	Query from Bidder	NGS Response
1	<p><b>The scope of services described on Annexure 3 can be developed by us but requires support from the Admin side. Those requirements are mentioned below:</b></p> <p>To provide information through CMS, we need the support from the developers who are currently working on National Games 2015. They should provide the API in order to sync the datas with the app. If the scheduled datas are provided by them, then we could provide separate admin and user modules for the application.</p> <p><b>App should pull results from the National Games website and update automatically.</b></p> <p>To pull datas from website, the app should sync</p>	<p>CMC Ltd, who are providing the Games Management Software for the Games, will provide schedule and medal tally in XML format.</p>

	with the served side of website. For that API of website is required.	
2	<b>Security Audit</b> - Can we get some recommendations on what security measures need to be incorporated within the app? Also which 3rd party will be conducting the audit?	User data collected for registration must be encrypted. Security audit will be done internally by NGS
3	<b>Admin Module</b> - This needs to have a CMS. We need more details on this requirement. What data needs to be stored, what will be the use cases etc for use to determine the effort and the associated cost.	Venue details, medal tally, schedule and information about sports need to be stored. Admin must be given permission to modify schedule, medal tally, and results manually if needed.
4	<b>User Module</b> - Is the data source going to be with NGS? If yes, then will NGS provide us service to fetch data related to Venues, fixtures & results? If not then we will require a service which interacts with their DB to fetch this info. If we have to build this service then additional effort will be required which will have implications on the cost.	Data should be hosted by the app developer. Only medal tally and schedule need to be updated from website. CMC will provide these in XML format and do the necessary handholding.
5	<b>Notifications</b> - Will the notifications be automated or manual? If NGS requires an interface which can be used to send notifications to the app. We will require more details here related to the kind of inputs the user will send via this interface.	Notifications will be manual. Any updates/changes/warnings will be sent as notifications
6	<b>Virtual Torch App</b> - Sharing the torch- To share the torch it is important to have the app installed on both devices. Not sure how we will ask the user to download the app just by device level pairing. We can instead suggest a share via social feature in the app?	Only social media share is needed
7	Different device manufacturers use NFC chips (& Bluetooth transmitter/receiver) provided by different vendors. Hence, lack of inter compatibility amongst some NFC phones may cause an issue.	Share option via NFC is removed
8	Both the documents (technical and financial) needs to be submitted via post? –	Yes. Technical and financial Bids need to be in separate envelopes. The two envelopes should be enclosed in an outer envelope and mailed to NGS.
9	As per our policy we do not submit any monetary guarantee or any deposit. So is the	They are mandatory.

	EMD and PBG mandatory? –	
--	--------------------------	--

- 3. The last date of bid submission is extended to 11:30am, 21/11/2014. Bids will be opened at 12:00 noon on 21/11/2014.**
